TITLE	Selected Outdoor Recreation Statistics.
INSTITUTION	Department of the Interior, Washington, D.C. Bureau of Outdoor Recreation.
PUB DATE	Mar 71
NOTE	144p.
AVAILABLE FROM	Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. (Stock No. 2416-0041, $1.25)
EDRS PRICE	MF-$0.65 HC-$6.58
DESCRIPTORS	Bureaucracy; Employment; Federal Legislation; Financial Support; Outdoor Education; Planning; *Programs; *Recreation; Recreational Activities; Resources; *Services; State Agencies; State Federal Aid; State Recreation Legislation; *Surveys; *Tables (Data)

ABSTRACT

In this recreational information report, 96 tables are compiled from Bureau of Outdoor Recreation programs and surveys, other governmental agencies, and private sources. Eight sections comprise the document: (1) The Bureau of Outdoor Recreation, (2) Federal Assistance to Recreation, (3) Recreation Surveys for Planning, (4) Selected Statistics of Federal and State Agencies, (5) Governmental Finances and Employment, (6) Recreation Expenditures and Prices, and Private Production and Services, (7) Detailed Statistics for Specific Activities (Golf, Hunting, and Fishing), and (8) Special Studies of Recreation Resources. Each section contains tables of data preceded by an introduction providing background information, explanation of terms, and sources of information. Included are an appendix (Major Legislative Authority of the Bureau of Outdoor Recreation) and a subject index. (MJB)

FOREWORD

This report was compiled in response to the many requests for recreation information directed to the Bureau of Outdoor Recreation (BOR). These requests clearly demonstrated the problems and duplication of effort associated with attempting to assemble recreation data by going from one organization to another. The content, therefore, consists not only of data from BOR programs and surveys but also some of the recreation-related statistics compiled by other governmental agencies and private sources.

The Bureau plans to publish subsequent editions from time to time, as warranted by the availability of more recent data for those tables not based on one-time surveys. In addition, the potential for expanded coverage exists in some sectors, replacing those tables for which no new information becomes available.

Each of the several sections of this report is preceded by an introduction which provides background information and an explanation of terms utilized in preparing the publication. In addition, the sources of information cited in each introductory section give a more explicit description, as well as greater depth of data than included within this publication.

The Bureau's various program divisions supplied much of the data about their functional areas to the Bureau's Division of Statistics and Data Processing. The assistance of many persons from contributing governmental and private organizations is gratefully acknowledged.

Douglas Hofe J.

H-12. Northern New England vacation homes: Percent distribution of occupants by 1965 family income, August 1966 133

H-13. Northern New England vacation homes: Average weekly expenditures per vacation household, August 1966 134

H-14. Northern New England vacation homes: Seasonal usage, 1966 135

H-15. Northern New England vacation homes: Factors considered in selection, August 1966 136

H-16. Northern New England vacation homes: Percent reporting participation of occupants in outdoor recreation by activity, August, 1966 137

APPENDIX A. Major Legislative Authority of the Bureau of Outdoor Recreation 139

INDEX 143

Part A - The Bureau of Outdoor Recreation

Functions and programs

The Bureau of Outdoor Recreation was established on April 2, 1962, by Secretarial order. On May 28, 1963, Public Law 88-29, which became known as the Bureau's Organic Act, was signed by the President. This Act expressed the important role of the government in assuring that adequate outdoor recreation resources are available for the future benefit and enjoyment of Americans, and authorized specific planning, research and coordination activities. Subsequent legislation considerably expanded the responsibilities and functions of the Bureau -- the nine major legislative authorities are described in Appendix A.

The legislation makes it clear that the Bureau is not to manage land, water, or recreation areas, but to act as a coordinating agency. Briefly stated, it takes the lead in recommending and guiding government recreation policy, planning, technical assistance, and research.

The Bureau works with the recreation agencies in the States through its six regional offices. The State Liaison Officer (SLO), appointed by the Governor, is the official primarily responsible for coordinating recreation planning, acquisition and development within the State. He must maintain a comprehensive State outdoor recreation plan for the guidance of agencies at all levels of government, and administer grants from the Land and Water Conservation Fund.

The Bureau's principal programs are:

Nationwide Outdoor Recreation Planning

As directed by Public Law 88-29, the Bureau must:

a. Identify critical recreation problems.

b. Recommend solutions.

c. Propose Federal, State, local and private actions.

Resource Area Studies

a. Studies are conducted to determine if proposed areas are suitable for national parks and national recreation areas (including national urban recreation areas) or as elements of the national system of trails or scenic and wild rivers.

b. If found suitable, recommendations are made for the recreation use, development and level of administration (Federal, State, and local) best suited to realizing the potential of the area.

Water Resource Studies

a. The Bureau is involved in developing the recreation planning segment of comprehensive river basin studies, Bureau of Reclamation projects, and Corps of Engineers projects.

b. It is also concerned with the evaluation of the recreation aspects of Corps of Engineers navigation permits and Federal Power Commission license applications.

Federal Coordination

a. The Bureau acts as the focal point and clearinghouse for information concerning Federal programs affecting outdoor recreation and Federal-State relations. (This includes liaison with the Council on Environmental Quality and the President's Citizens' Advisory Committee on Environmental Quality.)

b. The Bureau is involved in the review of legislative proposals and Congressional testimony concerning outdoor recreation matters.

c. As directed by the Department of Transportation Act of 1966, as amended, the Bureau (through delegation by the Secretary) evaluates transportation-recreation/environmental problems and suggests resolution actions.

Technical Assistance

a. The Bureau disseminates outdoor recreation information to agencies at all levels of government, private organizations, business enterprises, and individuals through consultation, meetings, and publications.

b. Under Public Law 91-485, the Bureau is required to: (1) identify surplus lands needed for public park or recreation areas; (2) provide assistance to States and local governments; (3) prepare requests to General Services Administration for assignment; (4) transfer the surplus lands to States and local governments; and (5) be responsible for compliance action on the transferred properties. The Bureau also reviews actions taken under the Recreation and Public Purposes Act.

Research and Education

a. The Bureau sponsors, coordinates, stimulates, and conducts research on a wide variety of outdoor recreation problems.

b. The Bureau also acts in an advisory capacity on curriculum content and training programs concerning outdoor recreation and recreation-oriented environmental and conservation education.

Land and Water Conservation Fund

The Bureau administers the Fund which provides up to $300,000,000 in revenue annually for allocation to:

a. State and local governments (on a 50-50 matching basis) for acquisition and development of outdoor recreation areas and facilities and preparation of statewide comprehensive outdoor recreation plans.

b. Four Federal agencies (National Park Service, Bureau of Sport Fisheries and Wildlife, Forest Service, and Bureau of Land Management) for the acquisition of recreation lands.

Statewide Outdoor Recreation Planning

a. The Bureau assists States through grants to prepare and maintain statewide comprehensive outdoor recreation plans to help guide programs which have a long range impact on the fulfillment of recreation needs within the States. Information concerning outdoor recreation resources, needs, opportunities, policies, and action programs are contained in the State plans.

b. The Bureau monitors and evaluates State outdoor recreation plans for the purposes of establishing eligibility of States to participate in projects under the Land and Water Conservation Fund Act, and in determining conformance of various proposed State, local and Federal projects and programs with the State plans. A number of Federal legislative acts make direct reference to conformance requirements with statewide comprehensive outdoor recreation plans.

Part B - Federal Assistance to Recreation

Land and Water Conservation Fund, surplus property disposal, urban beautification and open space programs, fish and wildlife restoration

The degree of concern for outdoor recreation at all levels of government is reflected in the direct expenditures for this purpose presented in Section E. A further indication of concern is the amount and nature of Federal support provided to State and local governments for recreation purposes. This section presents statistics from some major recreation assistance programs of the Department of Housing and Urban Development, the General Services Administration, and the Department of the Interior.

The Land and Water Conservation Fund Act of 1965, P.L. 88-578, which is administered by the Department of the Interior's Bureau of Outdoor Recreation, established a fund to assist the States and Federal Agencies in meeting present and future demands of the American people for outdoor recreation. In the original legislation money in the fund was to be derived principally from: sales of surplus real property by the General Services Administration, proceeds of the Federal tax on fuels for motorboats, and entrance and user fees at certain Federal outdoor recreation areas. In 1968, P.L. 90-401 amended the Land and Water Conservation Act of 1965. The amendment authorized additional funds to be received from the Outer Continental Shelf Lands leased to private sources, and terminated the entrance and user fee provisions of the original Act. In addition, an authorized minimum accrual of 200 million dollars per year for five years beginning July 1, 1968, was established. Further amendments in P.L. 91-308 and P.L. 91-485 reinstated the entrance and user fee provisions through 1971 and increased the authorized annual minimum accrual to 300 million dollars beginning July 1, 1970, and ending June 30, 1989.

Grants-in-aid to the States from the Land and Water Conservation Fund provide up to 50 percent of costs for developing a comprehensive statewide outdoor recreation plan and for acquisition and development projects approved by the Secretary of the Interior. The State Liaison Officer, appointed by the Governor, is responsible for administering and coordinating the grant-in-aid program in his State. The funds appropriated by Congress are apportioned among the States in accordance with legislative direction that two-fifths shall be apportioned equally and three-fifths on the basis of need. Need is determined by the proportion of the U.S. population in each State, as well as a consideration of Federal resources and programs in the particular States. The District of Columbia, Puerto Rico, the Virgin Islands, Guam, and American Samoa are treated as States in apportioning the three-fifths on the basis of need. The apportionment for an individual State cannot exceed 7 percent of the total allocated.

6/7

A portion of the fund is also allocated to the Bureau of Sport Fisheries and Wildlife, the Forest Service, and the National Park Service for acquisition of recreation acreage. In addition, the Bureau of Land Management will share in the fund for future acquisitions.

In addition to the funds allocated to the States and to Federal agencies, a portion is set aside in a contingency reserve. The Secretary of the Interior authorizes expenditures from the contingency reserve to meet emergency situations and unforeseen needs of States and their cities or counties. The majority of authorizations from the contingency reserve have been in response to urban needs and for preservation of threatened resources. Tables B-1 through B-5 and Figures B-1 through B-6 trace the history of the Land and Water Conservation Fund program.

The Surplus Property Act of 1944 as amended in 1948 and 1949, administered by the General Services Administration, provides for preferential sale of real property for park and recreation purposes. Property no longer required by Federal agencies is offered for conveyance to State and local governments and certain nonprofit institutions for public park and recreation use at 50 percent of the fair market value. Under provisions of P.L. 91-485, signed in October 1970, the Secretary of the Interior is authorized to dispose of surplus property at up to 100 percent discount from the fair market value, if in his judgement recreation is the highest and best use of the property. Table B-6 summarizes the transactions from the beginning of the program through June 1970.

The Department of Housing and Urban Development administers grant programs which aid substantially in providing outdoor recreation opportunities to urban areas. The programs were established by the Housing Act of 1961, P.L. 87-70, as amended by the Housing and Urban Development Act of 1965, P.L. 89-117, and the Demonstration Cities and Metropolitan Development Act of 1966, P.L. 89-756. The Urban Beautification Program provides grants to State and local governments for urban beautification and improvement of open space, including basic park facilities. The Open Space Program provides up to 50 percent grants for acquiring and developing land for parks and open space in urban areas. Tables B-7 and B-8 provide statistical data on these programs.

The Federal Aid in Fish Restoration Act, P.L. 81-681 as amended, and the Federal Aid in Wildlife Restoration Act, P.L. 75-415, which are administered by the Bureau of Sport Fisheries and Wildlife, provide 75 percent grants to the States and certain territories for fish restoration and management and for conservation and restoration of wildlife resources. The funds are derived from manufacturers excise taxes on certain sports equipment. The proceeds are apportioned to the States for a variety of fish and wildlife purposes such as research, acquisition, development, rehabilitation, and improvement of fish and wildlife areas. Tables B-8 through B-10 summarize the income and apportionments for these programs for selected years.

Part C. Recreation Surveys for Planning

Public and private recreation areas and facilities; participation in outdoor activities

The Bureau of Outdoor Recreation has a continuing responsibility for outdoor recreation planning under authority of P.L. 88-29, the Organic Act of the Bureau. In order to carry out the purposes of this Act, the Bureau is authorized, through delegation from the Secretary of the Interior, to prepare and maintain an inventory and evaluation of outdoor recreation needs and resources. The Act also authorizes development of a system for classification of outdoor recreation resources to assist in their beneficial use and management.

In accordance with P.L. 88-29, and as a prerequisite to performing its planning function, the Bureau of Outdoor Recreation conducted three major inventories or surveys. These were: (1) an inventory of public outdoor recreation resources; (2) a sample survey of participation in recreation; and (3) a sample survey of private and quasi-public areas.

Following are summary descriptions of the surveys:

1. Inventory of public outdoor recreation areas and facilities.

   This inventory was designed to obtain detailed information on all Federal, State, and county areas regardless of size or location. In cities, areas over 10 acres in size were inventoried individually and areas under 10 acres in aggregate. All cities with over 50,000 population were included in the inventory, while approximately 33 percent of cities of 25,000 - 50,000 and 15 percent of cities of 10,000 - 25,000 were inventoried.

   The outdoor recreation classifications used in collecting the acreage data which form the basis for the percentage distributions presented in table C-4 are defined as follows:

   Class I. High density. Areas intensively developed and managed for mass use.

   Class II. General outdoor. Areas subject to substantial development for a wide variety of specific recreation uses in a relatively natural seeting.

   Class III. Natural environment. Areas that are suitable for recreation in a natural environment and usually in combination with other uses.

Class IV. Outstanding natural. Areas of outstanding scenic splendor, natural wonder, or scientific importance.

Class V. Primitive. Undisturbed roadless areas, characterized by natural, wild conditions including "wilderness areas."

Class VI. Historic and cultural. Sites of major historic or cultural significance, either local, regional, or national.

The inventory was completed in 1965. See tables C-1 through C-5.

2. Survey of participation in outdoor recreation.

One of the ingredients for evaluating outdoor recreation needs is the measurement of present and prediction of future participation in various outdoor recreation activities. The Bureau of Outdoor Recreation contracted with the Bureau of the Census to conduct a nationwide sample survey of participation and preferences for outdoor recreation activities. The survey, which was conducted in September 1965, covered 7,200 households constituting a representative sample of all Americans 12 years of age and older. See tables C-6 through C-9.

3. Survey of private and quasi-public areas.

Prior to the conduct of this survey, very little was known about the private sector and its contribution to outdoor recreation. Fragmented management patterns and scattered information from a number of associations and groups was all that was available. Thus, this survey constitutes the first broad and consistent measure of the private sector.

The survey covered privately owned and operated outdoor recreation enterprises and voluntary (quasi-public) organizations which were in existence at the time of the study, 1965. The coverage included nongovernment individuals, companies, corporations and agencies providing outdoor recreation, whether commercial or supported by public subscription such as the YMCA, Boy Scouts, Salvation Army, etc. It was conducted for the Bureau by a private contractor.

The survey was a stratified probability sample of 256 counties, on the basis of geophysical, population, and water area characteristics. See tables C-10 through C-15.

Part D. Selected Statistics of Federal and State Agencies

Federal ownership and visitation, State park areas, visitation and fees

The extent and nature of land and water area and its ownership is vitally important for outdoor recreation planning purposes. The importance of land and water becomes more evident as competing demands for their use increase. Demands for recreation uses are also increasing as reflected in visitation statistics at recreation areas. This section provides data on public land and water, and their recreation uses.

The Bureau of the Census, in 1940, measured the land and water area of the United States, including Alaska and Hawaii. Subsequent adjustments were made to refine and improve the statistics, which were most recently published in their *Area Measurement Reports* in May 1970. These data form the basis for areal statistics and relationships in this report.

The General Services Administration (GSA) annually surveys Federal agencies to determine Federal ownership and use of real property. GSA publishes the results in their annual *Inventory Report on Real Property Owned by the United States throughout the World*. The data are grouped by administering agency and by State, and the functional categories include recreation-related usage. Tables D-1 through D-4 provide data from the Census and GSA measurements of area.

The Federal coordination responsibility of the Bureau of Outdoor Recreation requires, among other things, a compilation of usage statistics at recreation areas administered by Federal Agencies. The Recreation Advisory Council Circular No. 6, *Federal Executive Policy Governing the Reporting of Recreation Use of Federal Recreation Areas*, further requires Federal agencies to refine and standardize use measurement to facilitate the administration of the Land and Water Conservation Fund. Tables D-4 through D-6 provide visitation statistics by individual agency and grouped by type of agency.

Prior to 1962, the National Park Service regularly collected data on state parks and published the results annually in *State Park Statistics*. In 1962, the Bureau of Outdoor Recreation surveyed State recreation agencies and published *State Outdoor Recreation Statistics - 1962*. The National Conference on State Parks surveyed the State park agencies in 1967 and published *1967 State Park Statistics*. From these sources we have developed a series of tables on State recreation areas and attendance and these are included in tables D-7 through D-9.

In 1970, the Bureau of Outdoor Recreation and the National Conference on State Parks surveyed state park and related agencies to determine the nature and extent of admission and user fees at outdoor recreation areas. The data are included in Table D-10.

- Represents zero. NA Not available.

1/ Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

2/ Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area.

3/ Areas of oceans, bays, sounds, etc., lying within U. S. jurisdiction but not defined as inland water.

4/ Federally owned land as a percent of the State land area.

Source: Area of State and adjacent water from Department of Commerce, Bureau of the Census, Area Measurement Reports, Series GE-20, No. 1, May 1970; Federally owned land as of June 30, 1970 from General Services Administration, Inventory Report on Real Property Owned by the U. S. Throughout the World, as of June 30, 1970.

- Represents zero or rounds to zero.

NA Not available in this detail.

1/ Includes small amount of acreage owned in U.S. Territories and foreign countries.

2/ The Federal Government accounts for real property at cost in accordance with principles prescribed by the General Accounting Office in Title 2, Subsection 12.5 of Accounting Principles and Standards for Federal Agencies. Estimated costs are used when actual costs are not reasonably ascertainable.

Source: General Services Administration, Inventory Report on Real Property owned by the United States throughout the World, as of June 30, 1970.

1/ The Federal Government accounts for real property at cost in accordance with principles prescribed by the General Accounting Office in title 2, Subsection 12.5 of Accounting Principles and Standards for Federal Agencies. Estimated costs are used when actual costs are not reasonably ascertainable.

NA Not available.

1/ A visitor day is 12 visitor hours which is the presence of one or more persons on outdoor recreation areas for continuous, intermittent, or simultaneous periods of time aggregating 60 minutes. Recreation Advisory Council Circular No. 6, "Federal Executive Policy Governing the Reporting of Recreation Use of Federal Recreation Areas," October 20, 1965, required member agencies to produce and report visitation in visitor days commencing in calendar year 1965.

2/ Includes visitation at areas owned by the reporting agency and administered by other Federal or State and local agencies.

Source: Department of the Interior, Bureau of Outdoor Recreation, data compiled from reporting agencies.

Cabins and hotels 3/.........	2,350	2,212	2,230	1,697	1,844	1,576	1,223
Organized camps 3/...........	2,055	2,249	2,206	2,235	2,096	1,697	1,480
Tent and trailer camps 3/....	31,839	18,753	18,563	16,217	13,734	7,650	3,377

1/ The list of reporting agencies is not identical over the years.
2/ In some years the totals do not equal the sum of the components because not all agencies reported a breakdown of the total figure.
3/ Guest days or camper days.

Part E - Governmental Finances and Employment

Data presented in this section are compiled by the Governments Division, Bureau of the Census. The Governments Division conducts a Census of Governments every five years, the most recent being for 1967. The quinquennial censuses are supplemented by annual surveys, which cover the Federal government, all State governments, and a sample of county and local governments.

The data compiled relate to four major subjects--governmental organization, taxable property values, public employment, and governmental finances. From among the various statistics, which encompass all government functions, those have been selected for this section which are relevant to recreation and conservation of natural resources. Related data, particularly aggregate data, are presented so the reader has a reference point for comparison. In addition, we hope to stimulate the reader to explore the wealth of data available in the source documents both by extracting selected recreation and natural resource data and by identifying sources on each table.

A finer breakdown of the rather broad natural resource category, particularly at the Federal and State levels, would have been desirable, but such breakdowns are not immediately available from the Census of Governments data. It is anticipated that, through discussions with the Governments Division staff, a finer breakdown of certain data as well as expanded information more applicable to our needs will be available in future years. For a fuller understanding of concepts, coverage and statistical limitations, we recommend that the reader refer to the list of selected definitions which follows, and the individual source books cited in the tables.

The concepts and terms used in the surveys and censuses of governments were originally developed by the Bureau of the Census for compiling data on State and local governments. Subsequently, in order to arrive at data comprising all levels of government, parallel concepts were applied to Federal Government data. Data for different levels of government may still not be exactly comparable due to the lack of parallelism in revenue and expenditure patterns.

For 1962 and earlier years, government finance statistics principally relate to governmental fiscal years ending within the particular calendar year. Financial data of local governments for 1962-63 and subsequent years are grouped in terms of fiscal years which closed within the 12 months, July 1 - June 30. No change has occurred in the fiscal period applicable to the Federal Government, the 50 State governments, most of the school districts, and numerous other local units. The change in time reference of coverage applies only for those counties, cities, and other local governments whose fiscal years end during the latter half of the calendar year.

Definition of Selected Terms

AMUSEMENTS. See under License Taxes and Sales and Gross Receipts Taxes.

CAPITAL OUTLAY. Direct expenditure for contract or force-account construction, for purchase of equipment (including replacements), and for purchase of land and existing structures. Construction comprises production of fixed works and structures and of additions, replacements, and major alterations, including design, site improvement, and provision of facilities that are integral parts of a structure.

CITY. See under local government. Used synonymously with municipality.

CURRENT CHARGES. Amounts received from the public for performance of specific services benefiting the person charged, and from sales of commodities and services, except liquor store sales.

CURRENT OPERATIONS. Direct expenditure for compensation of own officers and employees and for supplies, materials, and contractual services, except amounts for capital outlay.

EMPLOYMENT. "Total employment" is intended to comprise all paid governmental personnel--not only full-time employees but also persons engaged on a part-time basis. The part-time component consists to a considerable extent of paid part-time officials and other individuals whose governmental connection represents a form of community services or a source of incidental earnings rather than a principal employment or means of livelihood.

"Full-time equivalent employment," is a derived figure which represents the number of persons that could have been employed for the payroll amounts reported, if all personnel were engaged on a full-time basis at the average monthly rates applying to full-time workers for the particular functions and levels of government involved.

EXPENDITURE. All amounts of money paid out by a government--net of recoveries and other correcting transactions--other than for retirement of debt, investment in securities, extension of credit, or as agency transactions.

Expenditure includes only external transactions of a government and excludes noncash transactions such as the provision of perquisites or other payments in kind.

FISCAL YEAR. The 12-month period at the end of which the State or any State agency determines its financial condition and the results of its operations.

FISH AND GAME. Conservation and development of fish and game resources through regulation, protection, and propagation.

FORESTRY AND PARKS. Conservation, development, and promotion of forests and forest products and State park areas. Includes forest fire prevention and forest fire-fighting activities.

FUNCTIONS. Public purposes served by governmental activities (education, highways, public welfare, etc.). Expenditure for each function includes amounts for all types of expenditure serving the purpose concerned.

GENERAL EXPENDITURE. All expenditure of a government other than utility expenditure, liquor stores expenditure, and employee-retirement expenditure.

GENERAL REVENUE. All revenue of a government except utility revenue, liquor stores revenue, and employee-retirement revenue.

GENERAL SALES OR GROSS RECEIPTS TAXES. See under Sales and Gross Receipts Taxes.

INTERGOVERNMENTAL EXPENDITURE. Amounts paid to other governments as fiscal aid in the form of shared revenue and grants-in-aid, as reimbursements for performance of general government activities and for specific services for the paying government or in lieu of taxes.

INTERGOVERNMENTAL REVENUE. Amounts received from other governments as fiscal aid in the form of shared revenues and grants-in-aid, as reimbursements for performance of general government functions and specific services for the paying government or in lieu of taxes.

LICENSE TAXES. Taxes exacted (either for revenue raising or for regulation) as a condition to the exercise of a business or nonbusiness privilege, at a flat rate or measured by such bases as capital stock, capital surplus, number of business units, or capacity.

Amusements.--License taxes imposed on amusement businesses generally or on specific amusement enterprises.

Hunting and fishing.--Commercial and noncommercial hunting and fishing licenses and shipping permits.

LOCAL GOVERNMENT. Five major categories comprise local government which are distinguished in tables as follows: counties, municipalities, townships, school districts, and special districts.

LOCAL PARKS AND RECREATION. Local government parks, playgrounds, and play fields, swimming pools and bathing beaches, and special facilities for recreation and cultural-scientific activities, such as auditoriums, museums, stadiums, zoos, auto camps, recreation piers, and boat harbors. See also Natural Resources.

NATURAL RESOURCES. Conservation and development of agriculture, fish and game, forestry, and other soil and water resources, including irrigation, drainage, flood control, and the like. Includes Federal and State parks, agricultural experiment stations and extension services, and Federal programs relating to farm price stabilization programs, farm insurance and credit activities, and multipurpose power and reclamation projects. See also Local Parks and Recreation.

PARIMUTUELS. Taxes measured by amounts wagered at race tracks, including "breakage" collected by the government.

REVENUE. All amounts of money received by a government from external sources--net of refunds and other correcting transactions--other than from issue of debt, liquidation of investments, and as agency and private trust transactions.

SALES AND GROSS RECEIPTS TAXES. Taxes, including "licenses" at more than nominal rates, based on volume or value of transfer of goods or services, upon gross receipts therefrom, or upon gross income, and related taxes based upon use, storage, production (other than severance of natural resources), importation, or consumption of goods.

SELECTIVE SALES AND GROSS RECEIPTS TAXES. Sales and gross receipts taxes imposed on sales of particular businesses, separately and apart from the application of general sales and gross receipts taxes.

STANDARD METROPOLITAN STATISTICAL AREA. A group of counties with a central city of 50,000 inhabitants or more, in which the activities form an integrated economic and social system.

NA Not available. 1/ Duplicative intergovernmental transactions are excluded. 2/ Capital outlay figures for 1957-59 reflect a difference in categories used to determine capital outlay and construction expenditures. The number of categories are decreased in 1960. Note: Because of rounding and selection of categories, detail may not add to totals. See introductory narrative to Part E for definition of fiscal years.

Part F – Recreation Expenditures and Prices, and Private Production and Services

The Commerce Department's Office of Business Economics publishes annual data on personal consumption expenditures by type of product in conjunction with the presentation of the national income and product accounts. The data appear each July in the National Income Issue of the Survey of Current Business.

Those commodities and services most directly related to outdoor recreation have been selected from among the various lines for which personal consumption expenditures are available. The categories are rather broad, with each including a wide variety of products and services. However, the listed items do not constitute a measure of the total level of personal consumption expenditures for outdoor recreation, since many other recreation expenditures are inextricably linked with their nonrecreation counterparts (transportation, housing rental, special clothing, etc.). Nevertheless, the recreation-related series provide a trend which can be compared with that for aggregate personal consumption expenditures, as well as being useful measures in themselves.

The Bureau of Labor Statistics (BLS), Department of Labor, publishes consumer price indexes (CPI) each month in its report, The Consumer Price Index. The CPI measures average changes in prices of goods and services usually bought by urban wage earners and clerical workers.

The table in this publication shows annual indexes for recreational goods and services. However, monthly indexes for the same items are available and are published regularly by BLS.

The specific items priced each month were selected by BLS to represent the movement of prices of all consumer goods and services, since it would obviously be impractical to make a monthly survey of the price of every consumer item on the market. Although the individual items selected as representative of recreational goods and services are not limited to outdoor recreation, the entire list has been included to clarify the content of the two group indexes.

The Economic Censuses, which provide data on establishments, volume of business, and employment in trade, service, and manufacturing industries, are made periodically by the Bureau of the Census, Department of Commerce. The three most recent censuses occurred in 1958, 1963, and 1967, with the next scheduled for 1972.

Although other sources provide some similar data by industry on a more current basis, none gives so much detailed information over as broad a range of industries as the Economic Censuses. From among the vast array of statistics available, those have been selected which most directly and clearly relate to the outdoor recreation industry. Many other outdoor recreation goods and services are provided in such close conjunction with those that are non-recreation related that they cannot be segregated for separate presentation in the Census reports, or are not economically significant by themselves. However, additional information specifically related to outdoor recreation is available in some of the companion volumes to the sources cited, e.g., the reports giving data by geographic area and by merchandise line sales.

Part G—Detailed Statistics for Specific Activities

Golf, fishing, and hunting

The purpose of this section is to provide detailed statistics for individual outdoor recreation activities. The coverage in this first issue is limited to golfing, fishing and hunting. One of the major tasks in preparing for the next issue will be to contact the various associations of manufacturers, dealers, participants, and other advocates of particular activities with the objective of broadening the scope. We anticipate that such associations will be able to provide comprehensive data for a significant number of additional activities.

The National Golf Foundation, which was founded in 1936 by the major manufacturers of golf equipment, maintains a continuing survey of golfing activity, both as to participation and facilities. The Foundation issues its Information Sheet ST 1 annually, from which data have been selected for presentation in tables G-1 through G-5.

State data on the number of hunting and fishing licenses issued and aggregate costs are compiled each year by the Bureau of Sport Fisheries and Wildlife. The series date back to the 1920's and 1930's; tables G-6 through G-9 give annual data from 1960 to data.

Beginning with 1955 the Bureau of Sport Fisheries and Wildlife has sponsored a sample survey of sport fishermen and hunters every five years. Some of the major findings from the 1965 survey, and in some cases related data for 1955 and 1960, are presented in tables G-10 through G-16. The next survey in this series, to be conducted early in 1971, will provide similar information for 1970.

Table G-1.--Number of golf facilities by type and size, 1931-1970

Year	Total	Type			Size 1/	
		Private 2/	Daily fee	Municipal	9-hole	18-hole
1970.....	10,188	4,619	4,248	1,321	5,343	4,845
1969.....	9,926	4,459	4,192	1,275	5,277	4,649
1968.....	9,615	4,269	4,110	1,236	5,179	4,436
1967.....	9,336	4,166	3,960	1,210	5,069	4,267
1966.....	8,672	4,016	3,843	1,173	4,786	3,886
1965.....	8,323	3,887	3,368	1,068	4,554	3,769
1960.....	6,385	3,236	2,254	895	3,660	2,725
1955.....	5,218	2,807	1,534	877	3,048	2,170
1950.....	4,931	3,049	1,141	741	2,972	1,959
1946.....	4,817	3,018	1,076	723	2,930	1,887
1939.....	5,303	3,405	1,199	699	3,264	2,039
1931.....	5,691	4,448	700	543	3,341	2,350

1/ Size denoted by "9-hole" for 9-hole and under. "18-hole" for 18-hole and larger courses. Data include both regulation and Par-3 facilities.

2/ Includes military, school, and industrial facilities.

---

[1] Shift in classification vs. 1960 survey resulted from reclassification of U.S. land area as urban or rural after the 1960 Census.

Note: These estimates of the number of the population are derived from the sample survey. These estimates vary from official estimates of the population.

Part H— Special Studies of Recreation Resources

Islands, trails, and vacation homes

From time to time the Bureau of Outdoor Recreation conducts or sponsors special studies of specific outdoor recreation resources. The purpose is to formulate recommendations for the preservation, enhancement, and more effective utilization of these resources. The tables in this section present selected data from several studies; additional detail is available from the source cited on each table.

The objective of the island inventory was to obtain resource information on all islands 10 acres and larger in size, regardless of ownership. More than 26,000 islands were covered in the survey. Detailed study was also made of certain islands with exceptional potential for public recreation. The publication Islands of America includes descriptive information by state for specific islands and island groups having state, regional or national recreation potential which are currently unavailable to the public.

The trail study provided information needed to arrive at recommendations for development and protection of a balanced system of trails--in the Nation's metropolitan areas as well as in the countryside--in cooperation with State and local governments and private interests. This section presents, from among the statistics collected in the study, existing and proposed mileage of Federal- and State-administered trails by State. Trails for America provides a considerable amount of more detailed data.

Among the recommendations emanating from the trail study was a proposal for a system of national scenic trails. Public Law 90-543, which established a National Trails System, designated the Applachian and Pacific Crest Trails as the initial components of that system. National scenic trails are designated only by Act of Congress. Their scenic, historical, natural, or cultural qualities must be superior to those of other trails in the country. Congress has also designated 14 other routes for study and possible inclusion in the National Trails System.

The sample survey of second homes in the United States, although not a Bureau of Outdoor Recreation study, provides information that ties in with the Bureau's survey of Northern New England vacation homes. The second homes survey was conducted in April 1967 by the Bureau of the Census working jointly with the Forest Service. From among the many tables in the source publication, those statistics have been selected which were considered to be of the widest interest in assessing characteristics of second homes and owners of such homes.

The Northern New England vacation home study is based on 465 interviews conducted by a private contractor for the Bureau of Outdoor Recreation and 69 Corps of Engineers interviews made as part of a study in the Connecticut River Basin. The combined results are considered to be representative of late summer 1966 vacation home occupants in the three Northern New England States: Maine, New Hampshire and Vermont. The purpose was to study the present and potential role of vacation homes relative to outdoor recreation. Some of the statistical findings relative to characteristics of the homes and their occupants are presented in this section.

- Represents zero or rounds to zero.

1/ For the list of islands considered out of scope, see footnote 1 of table H-1.

2/ In many cases the classified acreage differs from the aggregate acreage shown in table H-3, because the reporting of acreage by ownership often was incomplete and in a few instances was duplicative.

3/ Nonprofit organizations such as Boy Scouts, YMCA, and the Nature Conservancy.

Note: Because of rounding, detail may not add to totals.

- Represents zero or rounds to zero.

1/ For the list of islands considered out of scope, see footnote 1 of table H-1. Urban islands are those within 25 miles of urban areas of 50,000 persons or more.

2/ For the purposes of the island inventory, "development" included building sites as well as land associated with the site, such as yards and storage areas. Agricultural land, land used for forest production, and public and quasi-public recreation developments were considered as undeveloped; whereas, a private resort was inventoried as developed.

3/ Zero to 25 percent developed.

4/ 26 to 100 percent developed.

Appendix

Major Legislative Authorities of the Bureau of Outdoor Recreation

Bureau of Outdoor Recreation Organic Act, Public Law 88-29

The purposes of this Act are to assure adequate outdoor recreation resources for present and future Americans and to promote public and private actions to conserve, develop, and utilize such resources for the benefit and enjoyment of the American people. In order to carry out these purposes the Secretary of the Interior has been authorized to perform the following functions and activities, among others:

(a) prepare and maintain a continuing inventory and evaluation of the Nation's outdoor recreation needs and resources;

(b) formulate and maintain a comprehensive nationwide outdoor recreation plan;

(c) provide technical assistance to and cooperate with States, their political subdivisions, and private interests with respect to outdoor recreation;

(d) sponsor, engage in, and assist in outdoor recreation research; and

(e) promote coordination of Federal outdoor recreation plans and activities.

Land and Water Conservation Fund Act of 1965, Public Law 88-578 as amended by Public Laws 90-401 and 91-485

The Land and Water Conservation Fund is a special fund in the Treasury, now guaranteed an annual income of $300 million, through Fiscal Year 1989, to be available for appropriations for both Federal and State public outdoor recreation purposes. On the Federal level, it is available for recreation land acquisition by the National Park Service, the Forest Service, the Bureau of Sport Fisheries and Wildlife, and the Bureau of Land Management. On the State level, it is available for matching grants to the States, and through them to political subdivisions, for comprehensive planning, acquisition, and development of public outdoor recreation areas and facilities.

Wild and Scenic Rivers Act, Public Law 90-542

The Act establishes a national system of wild, scenic, and recreational rivers; designates the eight initial components thereof; and directs the Secretaries of Agriculture and of the Interior to study the suitability of 27 designated rivers for possible addition to the system. The Act also directs the Secretary of the Interior to encourage and assist the States, in formulating and implementing their comprehensive statewide outdoor recreation plans financed under the Land and Water Conservation Fund Act, to consider the needs and opportunities for establishing State and local wild, scenic, and recreational river areas.

National Trails System Act, Public Law 90-543

The Act establishes a national system of recreation and scenic trails, designates the two initial components thereof, and directs the Secretaries of Agriculture and of the Interior to study the suitability of 14 designated trails for possible addition to the system. The Act also directs the Secretary of the Interior to encourage and assist the States, in formulating and implementing their comprehensive statewide outdoor recreation plans financed under the Land and Water Conservation Fund Act, to consider the needs and opportunities for establishing recreational trails on State owned or administered lands and on lands in or near urban areas.

Section 4(f) of the Department of Trasnportation Act, Public Law 90-495 as amended

Section 4(f) of the Act as amended requires the Secretary of Transportation to cooperate with the Secretary of the Interior and other Federal officials in developing transportation plans and programs that include measures to maintain or enhance the natural beauty of the lands traversed. In addition, the section prohibits the Secretary of Transportation from approving any program or project which uses publicly owned land within a public park, recreation area, or wildlife and waterfowl refuge of national, State, or local significance, as determined by the officials having jurisdiction thereof, unless (1) there is no feasible and prudent alternative to the use of such land and (2) such program includes all possible planning to minimize harm to such land.

Federal Water Project Recreation Act, Public Law 89-72

Section 1 of the Act requires coordination of recreation planning at Corps of Engineers and Bureau of Reclamation multi-purpose water resource projects with existing and planned Federal recreation developments. Section 6(a) of the Act requires any project report developed under the Act to include the Secretary's views on the outdoor recreation aspects of the project as developed in accordance with Section 3 of the BOR Organic Act.

Conservation Programs on Military Reservations, Public Law 90-465

Section 3 of the Act as amended authorizes the Secretary of Defense to carry out a program for the development, enhancement, operation, and maintenance of public outdoor recreation resources at military reservations in accordance with a cooperative plan mutually agreed upon by him and the Secretary of the Interior.

Hudson River Basin Compact Act, Public Law 89-605 as amended by Public Law 91-242

The Act directs the Secretary of the Interior to serve as the representative of the United States in negotiations with the States of New York, New Jersey, Vermont, Massachusetts, and Connecticut to adopt a Federal-State compact for the preservation and development of the natural, recreational, and other resources of the Hudson River Basin. The Act also requires all Federal agencies to consult with the Secretary concerning any plans, programs, projects, and grants within or affecting the Hudson Riverway. In addition, no Federal agency can take final action on a pending application for a license involving an activity that may affect the resources of the Riverway without allowing the Secretary ninety days to comment on the matter.

Federal Lands for Parks and Recreation, Public Law 91-485

The Act authorizes the Administrator of General Services, in his discretion, to assign to the Secretary of the Interior surplus Federal real property needed for use as a public park or recreation area. The Secretary in turn is authorized to convey such property for such uses to State and local governments at public benefit discounts ranging up to 100 percent of the fair market value thereof.
